

Power Rebates for Connecticut Light & Power Customers

Connecticut Light & Power (CL&P) is making it even more financially attractive for customers to purchase an ENERGY STAR Labeled Home. CL&P sees the program as a way to enhance their marketing efforts and increase consumer demand for energy-efficient homes. Energy Crafted Home is CL&P's program that meets or exceeds ENERGY STAR guidelines.

By using the ENERGY STAR logo in our advertising and partnering with a national program, said Joseph Swift, "lends even more credibility to our program and we're pleased to be a part of it."

To Save This Much On Your Utilities, You'd Usually Have To Move Back In With Your Parents.

Lucky for you, we have a way that's not quite so drastic: a new home that meets EPA's ENERGY STAR guidelines. We specially build our new homes to be at least 30% more energy-efficient than those built to standard code. With features like extra insulation, specially designed energy-saving windows, and high efficiency heating and cooling units, you'll start saving money on your utility bills from the moment you move in. Over the years, the savings can add up to tens of thousands of dollars. (Money you can use when your kids move back in with you.) 1-800-286-5000 ext. 2719

Connecticut Light & Power
The Northeast Utilities System

Energy products with the ENERGY STAR label use state-of-the-art energy-saving measures and are built to meet or exceed ENERGY STAR guidelines.

Using the ENERGY STAR logo in our advertising and partnering with a national program, lends even more credibility to our program and we're pleased to be a part of it.
